

Fox Class Autumn Term

In Science we looked at parts of different animal bodies and why they have them. We enjoyed meeting Miss Lawrence's tortoise Seth, who is 62 years old from Algeria.

We also looked at our different senses and how they work. We tasted and smelt four different liquids and then we felt four different foods and described them! (Yuck!)

In Literacy we read the story 'We're going on a bear hunt!' by Michael Rosen. We even had a bear come into our school and had to go on a hunt to find him! It was very exciting reading clues and problem solving.

We even had the circus come to school! It was really fun learning circus skills and we explored these movement skills in P.E. Also, we had a go at building our own tent outside, it was tricky, but we could make a bigger tent if we worked together!
