

Squirrel class Spring update.

In the first half of the term we enjoyed learning about extreme Earth - tornados, earthquakes, snowstorms, floods and volcanoes. We invited our families into class to make some model volcanoes and did a science experiment to create an erupting volcano.

In January we were lucky to be able to enjoy our own snowy day!

In the second half of the term we were very busy learning about Roald Dahl.

We designed our own factories and then made models of them.

Some of us dressed as Roald Dahl book characters on world book day.
What characters do you recognise?

In March it was Science and Art week. We carried out some exciting experiments such as making raisins dance and finding out what would happen if we added warm water to M&Ms!
