

# PE Action Plan 2019-2020 linked to School Improvement Plan

My **Intent** is to improve and develop the Health and Wellbeing of all pupils across the school through a varied and exciting curriculum, high expectations of all pupils and a culture of developing the whole child.

**Health and Wellbeing** - A commitment to Health and Wellbeing being evident throughout the school, with innovative policies and interventions capturing interest of pupils, supporting them to develop lifelong participation habits. Needs and interests of all pupils, including disabled, more able and those with special educational needs, fully provided for. Healthy eating is promoted across the school and with parents/carers, and school lunches meeting school food based standards.

**Implementation** (See curriculum map)

The **Impact** is that each child will improve and develop their Health and Wellbeing through a varied and exciting curriculum, before and after school provisions and collaborating with outside agencies and clubs. There will be high expectations set by the school and a culture throughout the school of developing the whole child being of paramount importance.
