FOR PARENTS/CARERS OF CLOSE CONTACTS OF COVID 19 at Drayton Infant School

Advice for Child to Self-Isolate for a further 12 Days

Dear Parent and Carer,

We have been advised that there has been a suspected case of COVID-19 within Reception.

The DFE/Public Health England have advised that in this instance we have to shut the Hedgehog, Mouse and Dragonfly bubble for 12 days from today and have identified that your child may have been in close contact with the affected child. In line with the national guidance, you should now ensure your child stays at home and self-isolates until the 7th December. Your child can return to school on the **8th of December**.

We are asking you to do this to reduce the further spread of COVID-19 to others in the community.

If your child is well at the end of the further 12 days period of self-isolation, then they can return to usual activities.

Other members of your household can continue normal activities provided your child does not develop symptoms within the 12 day self-isolation period.

Please see the link to the PHE Staying at Home Guidance for more information:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, you should arrange for them to be tested and all other household members who remain well must stay at home and not leave the house for 14 days.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

By household members staying at home for 14 days you will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able you should, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period

Further information on isolation is available here:

<https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance>

In the event that the test is negative, the child will still need to complete their original 14 day isolation period as a close contact of a positive case, this is because they may still have the virus although it was not detected by the test.

If your child is isolating due to developing symptoms themselves, or due the household isolation or being identified as a close contact please let us know as soon as possible in the same way you normally report absence. This will help us to take the right precautions at the setting.

Information on testing is available via the links below:

Symptoms of COVID 19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child or anyone in the household does develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- Follow the guidance on social distancing
- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
